

## TelescopicCrane Supertechno 30

### Simple control with maximum flexibility

Precision and speed are just two of the advantages of the TelescopicCrane. The camera system is ready for use in just a few simple steps. Thanks to the telescopic arm and a 2- or 3-axis remote head, every shot is filmed from the optimal angle. The ideal partner for every event.

## TelescopicCrane Supertechno 30

RemoteCamSystems Datasheet

### Technical data TelescopicCrane Supertechno 30

- Maximum length extended: 12 m
- Minimum length retracted: 4.8 m
- Back length of the arm: 2.4 m
- Telescope range: 7 m
- Maximum height: 9.2 m
- Maximum telescope speed: 1.5 m / s
- Power supply: 220 or 110 volts
- Maximum load: 35 kg
- Automatic compensator in horizontal and vertical movements
- Smooth movements at any speed
- Telescopic arm movement noise reduction system
- Mechanical lift for the telescopic column
- Total weight: 1200 kg
- 3- or 2-axis gyro-stabilized remote head
- Suitable for large broadcast cameras and film cameras
