

## TelescopicCrane Techno 22

### The precise lightweight crane

An allrounder that not only makes a good trap in tight spaces. Thanks to the optics height and a telescope travel of 4.7 meters, the TelescopicCrane is suitable for every situation. Another plus point of the TelescopicCrane Techno 22+ is that it is effortless to set up and operate.

## TelescopicCrane Techno 22+

RemoteCamSystems Datasheet

### Technical specifications TeleskopisCrane Techno 22+

- Maximum length extended: 8.24 m
- Minimum length retracted: 3.52 m
- Back length of the arm: 1.91 m
- Telescope range: 4.72 m
- Maximum height: 6.7 m
- Maximum telescope speed: 1.5 m/s
- Power supply: 220 or 110 volts
- Automatic compensator in horizontal and vertical movements
- Smooth movements at any speed
- Telescopic arm movement noise reduction system
- Mechanical lift for the telescopic column
- Total weight: 364 kg
- 3-or 2-axis gyro-stabilized remotehead
- Suitable for large broadcast cameras and film cameras
