

CameraCrane 120 – Version 12

Lightweight crane for sport- and studiosettings

Today's requirements are very high, so you need a very flexible and responsible camera system. The CameraCrane 120 is specially designed for speed and flexibility. To install the crane, you need a minimum of time. Thanks to a 12 m long boom, the camera cranes are particularly suitable for sporting use.

CameraCrane 120 – Version 12
